SCIENCE Tells How WOMAN Is Affected By HAT Hypnotism

By SYBIL ARDEN.

pass judgment. And that is the real almost a side of the face—is called son you dress—for somebody else! the "Fly-away!" and yet—listen to this!—a hat may be the expression of the woman, but tion and the mode of hairdressing scientific experiment now shows that the hat may dominate, temporarily, periments. Can you estimate the the mood and character of the real personality of these women by

iltry, however harmless, but deviltry exactly what they are not, just the same. If she wear a Puritan bonnet, even though really she be the Devil's daughter, she will feel in her mood and evidence in her action rectitudinous simplicity! It is, "Fly-away," may normally be a device of the saw avan in slans. therefore, idle to say, even in slang, that a woman talks through her hat, ostentation, in her experimental for, if all this be true, then the hat talks through the woman.

Classified Hat-Angles.

It is a sort of "hat hypnotism, by flattering friends to buy an ex-tremely coquettish hat at once showed flirtatious inclinations, de-cided to see just how far the hat in-

Madame, do you know how to wear your hat? By this it is standard, formal, conservative arrangement concerning which there are straight, but whether you can carry the hat upon your fairhead as though it were an essential part of you, and could not be worn or carried in any other fashion. Answer! Of course, you will not be able to tell with absolute certainty, for of woman's illusions that of dress is the most insidiously deceiving. Somebody else must pass judgment. And that is the real content of the face—is called the standard, formal, conservative arrangement concerning which there can be no cavil. It is dignity itself, it is propriety, from which all caprically the second, the "chic angle"; the third, the "tango-tilt"; the fourth "rakish"; the fifth, the "Sadie slant"; and the sixth, than which there can be no cavil. It is dignity itself, it is propriety, from which all caprically the second, the "chic angle"; the third, the "tango-tilt"; the fourth which obliterates an ear, and, in fact, almost a side of the face—is called

The women wearing them, be it said, are of tastes that would command them to select entirely different models. And the hats influenced them toward characters strange to them. They were the unconscious subjects of "hat hypnotism."

but with the communicable personality of a flesh and blood human being. And it may be you, though, it most cases it is likely to be someone else."

"Women's hats and dresses give one more and more the impression that they are birds," observes Mark Tellair," so that if a man have a keen eye for modes and maids and matrons, he may soon become an expert on ornithelogy. This, of course, is not meant to include chickens."

"Dr. Emil Rich, than whom few masculine observers of women have known her better, studied the hat question at close range and his comments have freshness and-originality. "Suppose a woman of 30 enters a large millinery establishment;" he has said. "The floor-walker or some other very superior person shows her held in one's hands in an immovable position, shines forth as mere glory, grace, and beauty.

"Forthwith the lady jumps to the connection that such a beautiful thing, straight from — (follows an integral to the comments for the street of the personality of the general grade if worn by her. How Artistic Skill Helps WAR Plans

NE of the ingenious ideas of modern war strategy is to utilize artist skill in making a drawing of a fortification without be traying its purport on the surface. The py makes a drawing which appears to be an ordinary landscape. If caught with it he might pose with comparative safety as an artist who had been sketching for pleasure and was en-tirely ignorant of the existence of any fort and its surroundings.

Intepreted according to a secret code, however, the picture reveals to the spy's government a fairly complete plan of a fort. This is indicated by the character and position
